

Dynamax[®]

CONTROLLED RELEASE CAPSULES FOR **ADULT SHEEP**

100 days of controlled release protection

DYNAMAX[®] Controlled Release Capsules provide continuous release of short-acting ingredients to ensure reliable efficacy, providing **100 days broad-spectrum protection** against all economically important roundworms from a single capsule treatment.

This is followed by a quick shut down at the end of the payout period to avoid a long sub-lethal tail which could actively select resistant worms. Minimising the tail helps to minimise the chance of resistance developing.

Protecting your investment, all day, every day – for 100 days

Cost and potential production benefits of controlling worms in ewes at lambing

Ewes were treated with controlled release capsules prior to lambing

| Ewes | Increase | Value |
|--|-----------|----------------|
| Retained bodyweight over lambing | 5 kg | \$10.00 |
| Increased wool growth | 0.3 kg | \$4.50 |
| Retained wool tensile strength | 10 N/ktex | \$1.90 |
| Increased lambing percentage | 5% | \$7.50 |
| Increased weight of lambs at weaning | 5 kg | \$15.00 |
| Total increase in value per treated ewe | | \$38.90 |

Source: NLRS and AWEX. Values current as at December 2017, but will vary according to the prevailing market prices at the time.

Productivity and profitability benefits of 100 day worm control in weaners

| Weaners | Increase | Value |
|---|-----------|----------------|
| Increased liveweight | 5 kg | \$15.00 |
| Increased wool growth | 0.5 kg | \$7.50 |
| Retained wool tensile strength | 11 N/ktex | \$2.25 |
| Reduced weaner mortality | 3% | \$4.50 |
| Total increase in value per treated weaner | | \$29.25 |

Source: NLRS and AWEX. Values current as at December 2017, but will vary according to the prevailing market prices at the time.

- ✓ Increased meat production
- ✓ Increased wool production
- ✓ Decreased dags/scouring
- ✓ Decreased pasture worm egg contamination
- ✓ Less crutching of ewes and lambs
- ✓ Reduced tail enders in mob
